by R. G. Helmer**

See the Comments on the decay of <sup>95</sup>Zr for information on other parameters.

**Nuclear data**

The half-life of the isomeric state is from 69FO01, where it is given as 86.6(8) h; other: 84(2) h (53SL14). See also 55DR43 and several older values quoted in 53SL14.
