

## 1 Decay Scheme

Ni-57 disintegrates by electron capture (56.6 %) and positron emission (43.4 %) to excited levels in Co-57. The transition to the ground state has not been observed.

*Le nickel 57 se désintègre par capture électronique (56,6%) et émission de positrons (43,4%) vers des niveaux excités de cobalt 57. La transition vers le niveau fondamental n'a pas été observée.*

## 2 Nuclear Data

$T_{1/2}({}^{57}\text{Ni})$	:	35,9	(3)	h
